Our team's story

Growing up in a rural area with a humble background are two young energetic graduates who come together as husband and wife and started their own manufacturing company in the year 2009.

With little resources and limited finance, the company survived its first year of relentless operation through sheer hard work and perseverance by capturing the market with just 3 of their most popular waste bin designs. From an initial work place the size of a garage, the company has since grown in size and scale to cover an entire factory floor area of 40,000 sq ft, complete with the latest laser cutting machine, CNC machine, hydraulic forming press machine, semi-automatic welding machine and among others.

Today, we have transformed ourselves to become highly efficient in our manufacturing process with sustainability at the core of everything we do. By combining innovative designs to functionality in our product, we are now able to supply the widest range of recycle bin, portable signage and umbrella stand, luggage trolley, utility cart, retractable queue stand and barricades, including other steel fabrication to customer's specification and requirement.
